

## eMysteries

### Detective Stories to Engage Students in Close Reading with the Use of Mobile Devices

#### eMysteries MOOC

---

The Consortium of the European Project **eMysteries** is pleased to announce the creation of its **online platform**.

The MOOC focuses on the development of educational content and will serve as a tool for helping teacher's professional development.

Watch the **teaser video** of eMysteries MOOC and get ready to experience it: <https://www.youtube.com/watch?v=8RoKQHsqq8w>

The eMysteries MOOC consists of 7 modules:

- **First module:** Mystery detective stories
- **Second module:** Women and detective stories
- **Third module:** Teaching detective stories
- **Fourth module:** Close reading
- **Fifth module:** Creative writing
- **Sixth module:** Creating digital detective stories
- **Seventh module:** Interactive environment

Take advantage of the innovative educational practices and suggestions developed in the framework of the project in the following website <https://emysteries.4eclass.net/login/index.php>

### Multiplier Events in all partner countries

---

Multiplier Events took place in **Portugal, Cyprus, Ireland, Spain and Germany** in order to inform project's stakeholders and specifically teachers of the secondary education on the innovative methodologies, tools and resources that were produced during the project for addressing the reading and writing needs of under-skilled upper secondary school students. Specifically, the e-Reading Mysteries Toolbox for teaching and writing, detective stories and the e-Reading Mysteries mobile-device-supported interactive environment were demonstrated. In addition, information about the MOOC was presented and teachers were encouraged to register to the online platform and use the materials provided with their students. The events reached **more than 160** participants.

Overall, partners have received very positive feedback about the overall work and participants have also expressed interest in using the resources developed.
